Questions

1. What did I do this week?

- Created the GUI
- Wrote the user guide
- Developed and tested integration tests
- Resolved a delimiter-related issue
- Worked on the testing documentation
- Wrote the README file

2. How has the program progressed?

- The program is progressing well. The gui is now functioning as intended and aligns with the original design goals.

3. What did I learn this week/today?

- I learned about the principles of integration testing, including how modules interact within a pipeline structure.
- I learned how to use the Python Tkinter library, particularly in improving the aesthetics of the gui.

4. What remains unclear or has been challenging?

- The most challenging aspect this week was designing the integration tests, especially identifying which parts of the system should be tested together and what potential vulnerabilities to account for.

5. What will I do next?

- Finalise the testing and implementation documentation
- Improve the intelligibility and quality of the generated text, if possible
