Questions

1. What did I do this week?

- Expanded the unit test coverage, including tests for the Node and TrieTree classes, Markov chain functions, and text generation functions.
- Investigated and attempted to debug an issue related to reading csv files.
- Wrote the implementation documentation.

2. How has the program progressed?

- The project is progressing well and is approaching its final stages.

3. What did I learn this week/today?

- I learned about fixing csv related issues and improving testing design.

4. What remains unclear or has been challenging?

- Issues with csv delimiters: in some cases, the program is unable to correctly identify the separator. I plan to address this in the coming week.
- This delimiter issue has also affected unit tests, causing several of them to fail.

5. What will I do next?

- Develop end-to-end tests and a user guide.
- Resolve the csv file reading and delimiter detection issues.
- Complete the testing documentation.
